

**Some simple tips to avoid damage**

- Don't clean wooden floors with a wet mop. Too much water can cause the floor to swell, warp or turn grey.
- Don't use wax, soap or other household cleaners on wooden floors coated with finish. They can dull the floor's finish.
- Don't let sand, dirt or grit build up. They can act like sandpaper: abrading and dulling your floor finish.
- Vacuum or sweep your floors regularly. Once every week is recommended.
- Remove spills promptly using your Bona Mop and Bona Wood Floor Cleaner.
- Place mats at exterior doors to trap sand and grit. Use rugs in high traffic pathways, at the ends of stairs and near doorways. Avoid rubber backing or non-ventilated rugs.
- Use protective pads or caps on furniture.
- Trim your pet's claws. Proper claw trimming helps avoid scratches and gouges.

**Just spray and clean**

Remove dirt and grit.

Spray with Bona Wood Floor Cleaner.

Wipe with a slightly damp Bona Cleaning Pad.

**Renovate your old wooden floors with Bona's products**

Despite regular cleaning and care, a wooden floor will eventually require renovation. This involves sanding and the application of a new protective coating. Bona offers you Lifetime Support – a whole range of compatible products to keep your wooden floor looking good throughout its lifetime. The cleaning products presented in this folder are included in the range. We also have a complete range of products for the renovation of wooden floors, including sanding machines, abrasives, a wide range of water-borne finishes, oils and stains both for the professional user and the practical homeowner.

**Now you can renovate your floors without dust!**

Bona has developed a completely new and revolutionary technique for dust-free sanding. Ask your flooring contractor about dust-free sanding with the Bona Dust Care System and you can avoid the troublesome dust that is traditionally associated with sanding.

The new way of cleaning for perfect wooden floors

**New!  
 Just spray  
 and clean.**

# Keep your wooden floor looking attractive

Regular cleaning is the key to keeping your wooden floor looking attractive for years to come. Cleaning wooden floors used to be a chore. The traditional way is to use a mop and a bucket with a general household cleaner mixed with water. Not any more! With new Bona Wood Floor Cleaner, you just spray the floor and wipe it clean.

Because wood is different from other flooring materials, it requires special cleaning and maintenance products to retain its beauty. Bona has the complete answer: the Bona floor care range, based on Bona's 80 years' experience of taking care of wooden floors. Professional flooring contractors, cleaning companies and architects rely on our products because they are made especially for wooden floors.

## Bona Wood Floor Cleaner

- Protection and care for your floor.
- Streak-free cleaning, without residues.
- Effectively removes stains, dirt and grime.
- Cleans without adding water. Water can damage wood.
- Ready to use. Just spray and mop. No mixing. No bucket.
- Non-toxic and environmentally sound.
- Especially made for wooden floors by the specialists.

Available in a 1-litre spray bottle as well as a 4-litre refill. Use together with the Bona Cleaning Pad in microfibre.

## Everything you need to get started

### The Bona Wood Floor Cleaning Kit includes:

- 1 litre of Bona Wood Floor Cleaner.
- Mop with handle.
- Washable Bona Cleaning Pad.

## Other floor care products from Bona

### Bona Wood Floor Refresher and Pad

For finished floors that are dull, scratched or showing signs of wear. Bona Wood Floor Refresher restores the beauty of wooden floors. The Bona Refresher Pad is reusable and attaches easily to the Bona Mop.
